

CONNECT

ENTERPRISE INTEGRATION

CONSISTENT DATA EVERYWHERE.

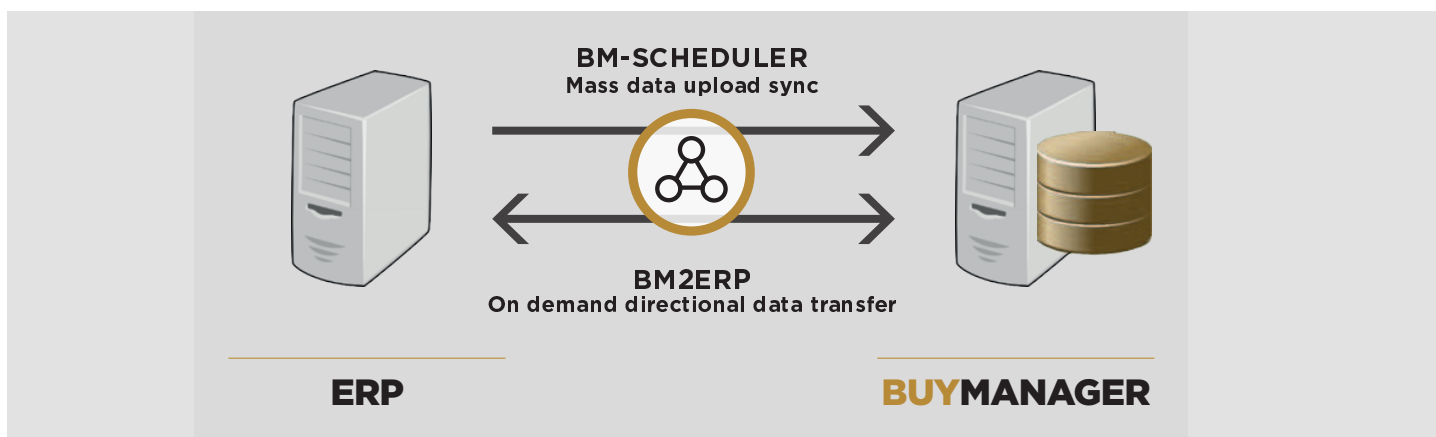

AUTOMATED DATA EXCHANGE.

INTEGRATION MADE EASY.

Reconciling data between Informations Systems and your enterprise application can be one of the most painful and time-consuming tasks you have.

CONNECT allow you to take advantage of the data available in your Information System (ERP, PDM, PLM) within Buymanager processes. It also offers the possibility to update your existing I.S. with the data collected by the different operational processes.

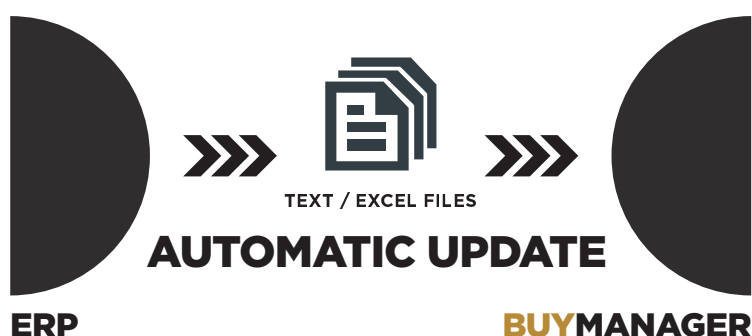

CONNECT also offer a **Multiple-ERP consolidation** capability.

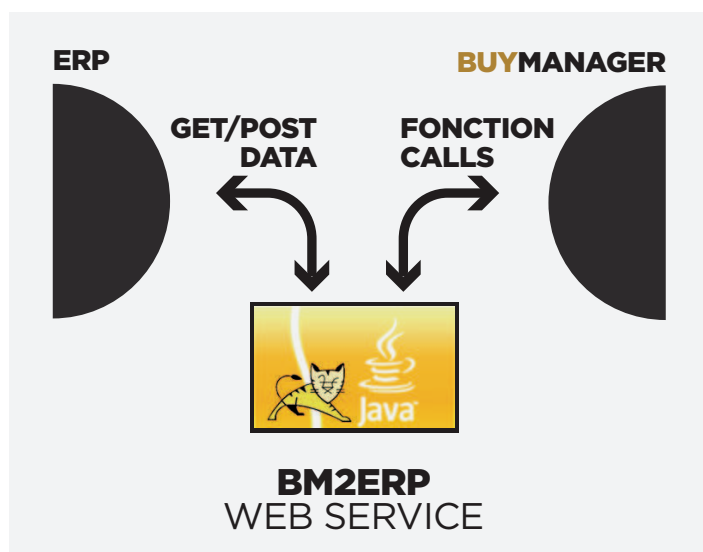

BM-SCHEDULER MASS DATA UPLOAD SYNC

HOW IT WORKS?

Manage your own integration with BM Scheduler tool. Create automated mass data upload synchronization. Data are extracted into text files from the ERP using standard tools such as SQL, ABAP. The data mapping between the two system is customized with user friendly Uploads

BM2ERP ON DEMAND BIDIRECTIONAL DATA TRANSFER

HOW IT WORKS?

Control your integration of Buymanager function calls with your ERP using BM2ERP tool. Develop only the specific code for your ERP to support the standard function call available. The functions will be integrated in a TOMCAT server installed within your enterprise local network. The customization to the specific rules of the ERP implemented becomes simple and easy.

FUNCTION SCOPE
